

YEAR 9 SCIENCE:

SPRING TERM TOPICS

After the Christmas holidays year 9 students will be starting the GCSE content and will start with the first topic of biology chemistry and physics. This content is fundamental to student understanding throughout their GCSE studies.

- B1 Cell
- C1 Atomic Structure
- P1 Energy

Each topic is broken up into two subunits and each of these will be assessed in an end of topic assessment. At the end of the year students will sit a paper that incorporates all content covered to prepare students for the transition to year 10.

HOMEWORK

Students will be set homework through the online platforms educake and Seneca. Students will also be set GCSE exam questions to help develop exam technique and confidence. Teachers will set other relevant tasks to support student progress.
