

YEAR 8 SCIENCE:

SPRING TERM TOPICS

- Microbes and disease
- Periodic Table
- Heating and cooling

Then there will be an end of cycle assessment. After which, students will move onto:

- Breathing and respiration
- Metals and Acids
- Circuits and electromagnets

HOMEWORK

There will be two or three homework tasks per topic. One homework will be an online quiz using the platform Educake, and the second homework will be a set of questions based on the topic for the student to answer. If there is a third homework for that topic, teachers will use this time at their own discretion, building on prior learning or developing wider scientific knowledge and skills.
